PATENT SPECIFICATION: CURCUMA BIOENHANCED FORMULATION

Application Number: IN 202311059999 A
Technical Field: Herbal nanocarrier formulation for improved curcumin bioavailability.

Summary: This invention discloses an aqueous self-emulsifying drug delivery system (SEDDS) comprising Curcuma longa rhizome extract and piperine at a 10:1 ratio with surfactant matrix.

CLAIMS:

1. A stable topical emulgel comprising 95% standardized Curcuma longa curcuminoids, 0.5% piperine, and a carbomer hydrophilic matrix maintaining pH 6.2.
2. The formulation of claim 1, demonstrating 3-fold higher dermal flux.
